

GRIZZLY MAX

3/8" WELD CAPACITY

The **Grizzly Max** offers a full 3/8" welding capacity and has the industries best capacitance to weight ratio. Because of the Grizzly Max's compact design it is suitable for "bench top" or automated applications. The Grizzly Max is sold as a stand-alone power supply or as a complete Stud Welding System with a gun, two ground cables, collets and weld tools.

HARNESS THE POWER OF A

SPECIFICATIONS

#4 to 5/16"	Weld Range	#4 to 3/8"
Contact or Gap	Weld Process	Contact or Gap
0.001 to 0.003 sec.	Weld Time	0.003 to 0.005 sec.
81,000uF	Charge Capacity Mains	162,000uF
115 VAC 50/60Hz	Supply	115 VAC 50/60Hz
Up to 30/min	Duty cycle	Up to 30/min
12" x 5" x 12"	Dimensions	13" x 6.5" x 15.5"
24.5 lbs.	Weight	37 lbs.

Technology is about rising to the top of its field and with the GRIZZLY and the GRIZZLY MAX CD stud welder series, you get just that.

The GRIZZLY pictured here, at only 24.5 lbs is the lightest in its class and we'll bet you can't find another 5/16" welder with all that this beast has to offer. From sleek designed power sources, ergonomic gun handles, on-board technology down to the foam lined carrying case for day to day use, you're covered and saving your machine from damage.

These GRIZZLY Machines are powerful, compact and user friendly. The technology is outstanding as each machine comes with LED diagnostics, Stepless Voltage Controls, a clear Digital Voltage meter, Precision circuitry, high efficiency fans, a compact design and absolute safety with an ESA certification.

See why GRIZZLY is becoming the fastest growing brand of stud welders on the market. Let DAVIS Stud Welding put a GRIZZLY in your hands today.

91 King St. Barrie, Ontario, L4N 6B5

AN INCREDIBLE WELDER AT ONLY 24.5 LBS!

STEPLESS VOLTAGE CONTROL

Dial into your exact weld settings, digit to digit with this stepless voltage control dial. No more guess work for the employee's using the machine.

DIGITAL READ OUTS

This easy to read high definition LED screen is superb. Large numbers make it easy to see on all types of work applications.

VISIBLE LED DIAGNOSTICS

Visible LED lights let you know instantly if there is a problem that needs to be addressed. LED lights let you know if you have power, stud on work, whether you are grounded and when a weld is completed.

DUAL GROUNDS

Two is always better than one when it comes to grounding. We make sure your welds have better circular weld zone with no weld run off.

THREE GUNS, ONE MACHINE

We offer you three choices when buying this machine. The contact gun for mild and stainless steel studs as well as weld pins. The gap gun for Aluminum welding for amazing adhesion and the Insulation gun for all types of cup head and weld pin applications.
